

B-W S3M BASIC is a BM-WM 375 BASIC direct derivation vacuum cleaner, strengthened with a new trolley and with features of great versatility and ease of use. To increase the versatility of the machine there are the countless options available in terms of optional filters, collection systems and related to the different types of material to be vacuumed. The main field of application remains the suction of dust and liquids, where it stands out for its effectiveness and reliability, confirming itself as one of the best products on the market.
